Review Categories Synchronization Backup Security CloudQ: GLOB returns empty I am trying to use GLOB function to get all files inside a directory in PHP but it returns empty string or 0 when it is not. Below is my code: '; } ?> If I run this code it will only print out 'abc.php'. I do not understand why it does not print out the other 2 files. A: From the documentation: If GLOB_BRACE is used, then the pattern "*" matches all files (a "**" is the equivalent in "globstar"). An empty string ("") matches only directories. The * is the same as **, so if you have *.php it would be the same as **.php and thus you get only one result with GL

Enables one-way synchronization only Auto-syncs changes when you launch Supports single cloud-based storage with synchronizing Automatically restores deleted documents from cloud storage Manages files online Can upload documents and manage directories from web interface Safes your files from malicious software, such as Trojans Many of us use Amazon's Kindle to read and download books from the internet. The thing is, you can also download the books from the internet that you bought through the Kindle store and saved on your Kindle, and that comes with the Kindle Owners' Lending Library. But how do you do it? Now, you can do this by downloading your existing Amazon.mobi files on your Kindle and importing them. However, this is not the most convenient way to do it. If you want an alternative, Amazon allows Kindle owners to create PDF or.mobi file of their Kindle books and store it on the Kindle (there are lots of sites that can help you do this). Then, you can download them (there are a lot of sites that can do this too), and there you have it. However, it's easier if you don't have to do it manually. Get Amazon to perform the conversion for you. They offer a service called KindleToMB (note the 'T') and KindleToPDF, which convert your.mobi to.pdf and.mobi to.pdf. So, now you have the files you can download, read, and save with the same security that Amazon gives you on your Kindle. It's an easy way of converting your Amazon books to any format you'd like. Amazon Kindle ebook reader is a good idea. However, there is a lot of room to improve its user experience. Amazon never considers that Kindle e-readers, especially the E-ink versions, may not be useable in bright sunlight. So we have developed a solar-powered Silk e-reader cover. Unlike the e-reader cover we know, it doesn't block your sun. It doesn't use external power supply. The energy to power your Kindle comes from solar cell. Our Amazon Kindle Solar Cover is easy-to-use. Use it only with Kindle's front light. Then, tilt the cover according to the exposure to the sun. The light energy will activate the cell under the cover. It will provide the voltage to power your Kindle so you
